

WELDER CONTROL REPAIR

K+S has full service capabilities to repair MIG, TIG and resistance welding controls. At K+S our Weld systems lab leads the industry in repair and testing capabilities. K+S has the experience to analyze and repair a wide variety of weld system components and performs system testing under load to verify functionality and durability. The systems utilized in the repair process are designed to simulate operation conditions in a plant environment.

K+S Services is an authorized service center for Lincoln, Miller, Hitachi and NSW.
