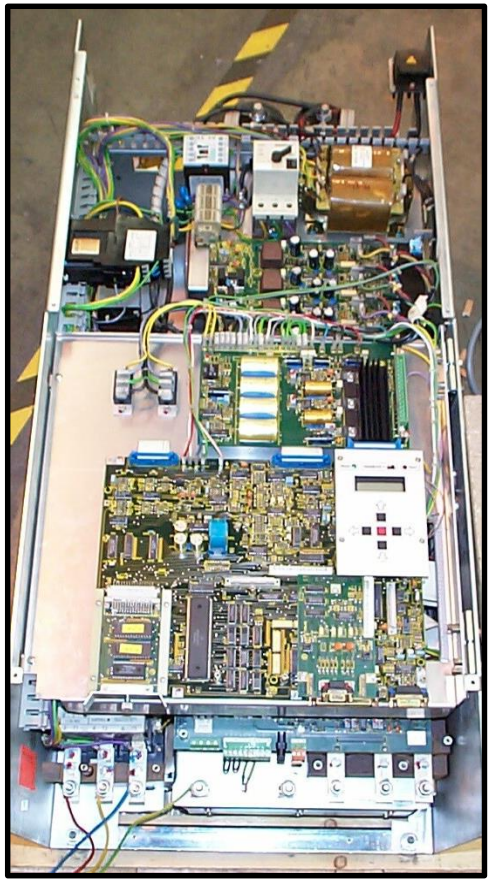
Indramat RAC 2.2 Spindle Drive



This is the Indramat RAC 2.2 series spindle drive. It is used in many high speed machining and positioning applications. K+s Services Kokomo facility is ready for full service repair support on these Indramat spindle drives. The K+S Kokomo test system utilizes an Indramat "2AD" series spindle motor for the closed loop run test and specially designed diagnostic fixtures for testing the spindle drives I/O and communications ports. This extensive diagnostic testing will assure a quality repair and reduce customer downtime**!**
