Schrader Bellows – Valvair II Pneumatic Valve

K+S Services has the capability to repair the full line of Schrader Bellows Valvair II pneumatic directional control valves. The test system shown above is equipped with universal manifolds, an electronic “cyclic” control box and a test cylinder. The valves are mounted on to the test manifold where 120 psi of filtered & regulated air is applied. The control ports from the manifold are connected to the test cylinder and cycled via the electronic control system. Performance of both single and double solenoid actuated valves are tested and verified to meet OEM specifications. Below is a list of some of the most common series of Schrader Bellows valves testable by this system.

L441 L655 L515 L425 L525 L485 L705 L615 L695

L445 L675 L545 L665 L465 L685 L645 L475 L625

ALL UNITS ARE SYSTEM TESTED

***12 MONTH IN-SERVICE WARRANTY**
