VICKERS VC SERIES VANE PUMPS

These are Vickers VC series combination pumps. They are like a mini power unit all in themselves. This type of pump will allow you to do two tasks with one pump. Note the knobs or handles on the units pictured. These are relief, unloading, and check valves all in one. They also have two cartridge kits or two pumping sections in each pump. The model number series for these units are VC108, VC109, VC128, VC138, VC148, and VC149. This design of pump has been around for at least 20 years. These pumps are common pumps on machine power units.

These units can be found in all industries.

ALL UNITS ARE SYSTEM TESTED
