PanelMate & TCP Terminals

K+S is capable of repairing all advanced types of terminals. This would include all the PanelMate series and Smartscreen series of user interfaces.

PanelMate and TCP are capable of user assigned (soft) keys. This is accomplished by programming the unit through the RS232 communications port from an external computer or similar device. After the unit is programmed, it can interact with input/output devices or peripheral hardware through the Data Highway + network.

These units are extremely flexible in terms of their application use and are capable of communicating with almost any PLC with the appropriate drivers and option cards installed. Therefore, they can be found in a wide variety of industrial applications**.**

AEG PanelMate Plus

IDT PanelMate Compact

TCP Smartscreen

ALL UNITS ARE SYSTEM TESTED

*12 MONTH IN-SERVICE WARRANTY
Unless otherwise stated at time of quotation

*NO CHARGE EVALUATION
Priority repair orders may incur in evaluation fee
