## PANLEVIEW SERIES TERMINALS

K+S is capable of repairing all advanced types of terminals. This would include all the PANLEVIEW 2711-xx series touch screen and keypad style terminals. **Some** of these include:

<b>2711-B5</b>	<b>2711-K5</b>	<b>2711-TA</b>
<b>2711-B6</b>	<b>2711-K9</b>	<b>2711-TC</b>
<b>2711-BS</b>	<b>2711-KC</b>	<b>2711E-K1</b>
<b>2711-K2</b>	<b>2711-T9</b>	<b>2711E-T1</b>

PanelView is different from the PanelMate or TCP in that it was strictly designed to work only in association with the PLC 5 processor. Everything else is very similar including the user assigned soft keys. Soft Keys are assigned by programming through the RS232 communications port from an external computer or similar device. After the unit is programmed, it can interact with input/output devices or peripheral hardware through the Data Highway + network.

These user interface terminals are very common and can be found in many applications, especially where PLC 5 processors can be found.

**ALL UNITS ARE SYSTEM TESTED**

**\*12 MONTH IN-SERVICE WARRANTY**

Unless otherwise stated at time of quotation

**\*NO CHARGE EVALUATION**

Priority repair orders may incur in evaluation fee
