INDRAMAT DKS + DKC SYSTEM

The **DKS** control panels and plug-in modules are extremely versatile and the same as those featured on the DDS test system.

The **DKC** utilizes its own dedicated control panel (ECODRIVE 03) as shown in the picture above. DriveTop software is again used for all aspects of system monitoring and setting of drive limits.

The required motor for the DKC ECODRIVE3 is the MKD servo. The required motor for the DKS is the MDD servo. Applications are very similar to those found on the DDS system.

Manual Control Panel

Automatic Control Panel

DriveTop Software
running on a standard
PC

ALL UNITS ARE SYSTEM TESTED

***12 MONTH IN-SERVICE WARRANTY**

Unless otherwise stated at time of quotation

***NO CHARGE EVALUATION**

Priority repair orders may incur in evaluation fee
