

### AC / DC DRIVE CONTROL REPAIR

K+S has over 35 years of experience repairing all types of AC / DC frequency & servo drives. Our Engineering group has designed over 500 dedicated drive related test stands to ensure a quality repair each and every time. We have also designed a special dynamometer that allows two motors work against each other with offsetting force to provide a dynamic load test system where we can make performance and rating adjustments to exactly the right levels on the fly. Below are just some of the many Manufacturers we can offer repair support for.
