Indramat DSC3.1 Servo Drive System

K+S Services has acquired a servo control test and diagnostic center for the Indramat DSC 3.1 servo system. The system consists of an Indramat TRANS01 controller, DSC3.1 servo drive, MAC series AC servo motors and a special diagnostic fixture designed to interface to all the TRANS01 / DSC communication and control ports. This system provides a totally configurable, closed loop environment to run test each of these components in simulated real world applications. The Indramat DSC series servo control system is used in many machining applications and are sealed and filtered for operation in areas with poor working environments!

ALL UNITS ARE SYSTEM TESTED

***12 MONTH IN-SERVICE WARRANTY**
Unless otherwise stated at time of quotation

***NO CHARGE EVALUATION**
Priority repair orders may incur in evaluation fee
