QUALITY REPAIR OF MANUFACTURING EQUIPMENT

Miller Continuum & Auto Continuum System

K+S Services has added testing and repair capabilities for the following systems:

- Continuum 350
- Continuum 500
- Continuum Feeder (Single)
- Continuum Feeder (Dual)
- Continuum Remote Operator Interface
- Continuum Cooler
- Auto-Continuum 350
- Auto-Continuum 350 w/Aux Power
- Auto-Continuum 500
- Auto-Continuum 500 w/Aux Power
- Auto-Continuum Wire Driver

We are an authorized service center for Miller Welders

In addition, K+S has full-service capabilities to repair all Miller products including Wire Feeders, Power Sources, Torch Reamers, and Portable units. At K+S our weld systems lab leads the industry in repair and testing capabilities. K+S can analyze and repair a wide variety of weld system components and performs system testing under load to verify functionality and durability. The systems utilized in the repair process are designed to simulate operation conditions in a plant environment.
