A and B Axis Hofmann Tables

- **We are a cost effective solution** and the tables never need to leave North America.

- Precision grinding jet engine components for a world class manufacturing.

- A axis rotates the work-piece while it is being ground by the main spindle.

- B axis rotates while the A axis table is rotating the part for contour grinding.

- The A and B axis tables are in a very corrosive environment due to the water base coolants that are being used. Replacing the components with OEM parts is critical.

- Once all parts are received from the OEM the turn-around time can be made in 2-3 weeks.

- The tables receive a complete overhaul and the replacement parts are supplied from the OEM.

- Tables are tested to OEM specifications.
