

SAVE OUR PLANET & SAVE MONEY ONE CRT CONVERSION AT A TIME

In manufacturing today, we're all trying to reduce our impact on the environment. One of the ways you can start is by retrofitting your old CRT monitors with new LCD displays. We offer a conversion that takes your old CRT monitors or MMI/HMI displays and replaces them with energy efficient LCD displays. LCD displays are brighter, lighter, more energy efficient and safer for the environment.

BEFORE

AFTER

CRT MONITOR

- Bulky and Heavy
- Prone to "Burn In"
- Smaller Viewable Screen Area
- Electromagnetic Radiation Emission
- 250% More Power Consumption over LCD's
- Low Resolution Image
- High Heat Emission
- Costly Disposal

LCD DISPLAY

- Light Weight and Slim
- No "Burn In"
- 100% Viewable Screen
- Little or No Electromagnetic Radiation
- Very Low Power Consumption
- High Resolution Image
- Very Little Heat Emission
- Less Costly Disposal

Virtually All Manufacturers Monitors Can Be Upgraded to LCD
