

Allen Bradley MicroLogix 1500 Series

K+S is able to fully test and repair the Allen Bradley MicroLogix 1500/1764 series controller. Our system consists of the 1764-24AWA Base Unit and 1764-LSP, LRP Processor Module.

The following features utilized in this system include:

Expandable I/O, MicroLogix 1000 or SLC500 compatible instruction set, RSLogix 500 programming software compatibility, field upgradeable flash operating system, and high speed input/output functions.

Additional Compact I/O Modules (1769) can also be added to the base unit when additional I/O functions are required. This allows a for a greater range of flexibility when designing a control system.
