

### Allen Bradley SLC Series PLC System

The Allen Bradley SLC series PLC system is a very compact and modular design. It is utilized in virtually any and every facet or industry. K+S Services can provide full diagnostics and system testing on this PLC system. K+S can test all types and revisions of processors, power supplies, racks and programming terminals as well as all communications, I/O and special application modules. Cycle testing for two to three days in heated conditions will ensure that any modules intermittent failures will be detected. Multiple Allen Bradley SLC racks have been set up perform diagnostics testing on batches of common AC & DC I/O modules.
