QUALITY REPAIR OF MANUFACTURING EQUIPMENT

Working Together Supporting Your Automation Repair Needs as a Supplemental Repair Provider

- **Trained Technicians** – Our technicians undergo continuous training in the field of their expertise.
- **System Testing** – Every repair must be tested under load to meet or exceed the specifications set by the OEM.
- **Available Parts** – K+S only uses new OEM or equivalent parts.
- **Obsolescence** – We have the ability to support your obsolete equipment.
- **Documentation** – All K+S repairs come with a repair, test, and failure analysis report.
- **Remanufactured Inventory** – Tested equipment for your immediate needs.

Every Certified Repair is backed by our 12 month “Bumper to Bumper” in-service warranty.
