

K+S Supports Numerous Different Repairable Parts Within an Automated Robotic Weld Cell

Opportunities Within a Weld Cell

- Robot Wrist
- Weld Gun & Tip Holders
- Servo Motors
- Safety Scanner / Light Curtains
- HMI
- Teach Pendant
- Axis Control Modules
- Power Supply Module
- I / O Modules

Additional Repair Commodities

- Weld Controller
- Tip Dresser
- Programmable Controllers

Our Repair Capabilities:

- | | |
|--------------------------------|-------------------|
| • Robot Controller Electronics | • PLCS |
| • Weld Power Sources | • Servo Motors |
| • Controllers | • Servo Actuators |
| • Wire Feeders | • Teach Pendants |
| • Robot Wrist Assemblies | • Torch Reamers |
| • Light Curtains | • Weld Guns |
| • HMI'S / Monitors | • Weld Tips |

K+S Services is an authorized service center for Fronius, Lincoln, Miller, Hitachi and Nippon Stud Welding.

Our core belief is providing quality repairs at a competitive price. We achieve this high standard of quality by developing in-house system test capabilities to test each unit to ensure it meets or exceeds OEM specifications. After the unit is repaired it is tested in a closed loop system to simulate how the unit will operate when placed back into service. Each repaired unit comes with a detailed failure analysis report letting you know why the unit failed and how the unit was repaired and tested. We also provide a one year in-service warranty.
