

KIMURA DENYOKI WELD GUN

Our Repair Process:

- Complete Teardown and Evaluation of all components
- Scope of work and failure analysis data recorded
- Components repaired where possible and replaced (with new) where required
- Every repair comes with new seals, hardware, bearings, wear rings, and pins
- Shunt pads are repaired if arced out
- Piston shaft repaired if needed
- Air cylinders are tested for tightness and cycles to ensure no leakage
- Machining capabilities to bring parts back to OEM spec
- All pertinent parts are leak and flow tested (including the shunt bar, upper and lower yokes)

- * Also repair other OEM's including: Obara, Dengensha, Denyo Kogyo & Milco
- * Repairs are less than half the cost of new
- * Expedited turnaround times & emergency repair services
- * Weld Gun repairs include a 12 month in-service warranty
