

PARKER WELD GUN CYLINDERS

With over 35 years of experience, our highly skilled Technicians can repair and test your weld cylinders, bringing them back to OEM specifications at a fraction what they would cost to replace. Cylinder rebuilds consist of the following:

- We perform a complete teardown and evaluation of all cylinder components and a failure analysis report accompanies each quote.
- Each rebuild comes with brand new hardware and seals, and unlike other vendors, K+S can rebuild cylinder shafts, pistons and housings instead of replacing.
- All cylinders are cycle tested for air tightness to ensure there is no leakage.
- All cylinders are thoroughly cleaned and painted before being returned back to your facility looking brand new.

Before

After
