

SICK S30A Laser Scanner

K+S has added the capability to repair and test the Sick S30A system to our already distinguished line of drives, PLCs, Robotics, Terminals and other industrial component repairs. K+S has full repair and testing capabilities of the following components comprising this system:

S30A-4011xx..Safety scanner, DI/DO, 4M

S30A-4111CP..Safety scanner, ProfiNet, 4M

S30A-6011xx..Safety scanner, DI/DO, 5.5M

S30A-6111CP..Safety scanner, ProfiNet, 5.5M

S30A-7011xx..Safety scanner, DI/DO, 7M

S30A-7111CP..Safety scanner, ProfiNet, 7M

All repairs include a new front screen and seal, and if needed the I/O and power supply module...all new from the OEM. Calibration and testing after the repair is done using Sick OE software. K+S can also supply original Sick accessories such as: mounting brackets, connection plugs and cables.

Applications Include: Robot Safety, Press Safety, Proximity Warning and Safety.
