QUALITY REPAIR OF MANUFACTURING EQUIPMENT

**AS AN AUTOMATION REPAIR SPECIALIST, WE ARE THE FIRST
AUTOMATION REPAIR SUPPLIER TO BECOME ISO-9001 REGISTERED.**

K+S Services core belief is to provide best in class quality repairs at a competitive price through full refurbishment and system testing. We achieve this high standard by developing in-house closed loop test capabilities that test each repair to meet or exceed the OEM specifications. After the unit is repaired and fully refurbished, these systems are used to simulate how the unit will operate when placed back into service. Each repaired unit comes with a detailed failure analysis / test report letting you know why the unit failed and any recommended preventative measures to stop it from happening in the future.
