

OILGEAR

K+S fully supports the repair and service of Oilgear hydraulic pumps and valves. We've got you covered! Our team of skilled technicians will give your pump the attention it needs and put it through our detailed inspection and repair process. Once the pump has been reassembled, our technicians will test to meet or exceed factory specs.

When your operations are down, K+S has got you covered:

- 1 **Equipment sales** refurbished pumps from our extensive inventory
- 2 **Repair services** to get your pumps back in 2 – 3 weeks
- 3 **Exchanges** to get you back up and running fast. We have many models built and ready for exchange on our shelves.

The benefits of choosing K+S for your Oilgear needs:

- **Fast** – our standard lead time is 2-weeks with emergency services available.
- **Affordable** – competitive market rates and we will rebuild & test controls at no additional cost.
- **Reliable** - 2-year operational warranty. All repairs & exchanges are fully tested prior to shipping.
- **Comprehensive** - repair of directional, pressure control, servo, and pre-fill valves.
- **Convenient** – willing to purchase your surplus Oilgear pumps.
- **Service** – 24-hour telephone support with unmatched Oilgear expertise.
