

Fronius TPS 400i System

K+S Services has added testing and repair capabilities for the following systems:

- Welders - TPS i 270, 320, 400, 500, 600
- Wire Feeder - WR25i
- Water Cooler – CU100i
- Torch Reamers (cleaners) – TC 2000 Touchless Cleaner

We are an authorized service center for Fronius Welders.

In addition, K+S has full-service capabilities to repair Fronius Power Units, Controllers, Wire Feeders, Pendants, and Foot Pedals. At K+S our weld systems lab leads the industry in repair and testing capabilities. K+S can analyze and repair a wide variety of weld system components and performs system testing under load to verify functionality and durability. The systems utilized in the repair process are designed to simulate operation conditions in a plant environment.
